Education

The University of Melbourne: *Masters of IT*

Jan 2024 – Dec 2025

- WAM: 79.2%, Specialized in Cybersecurity
- Relevant Coursework: Database Systems, Security & Software Testing, Machine Learning Security, High Integrity Systems Engineering, Cryptography, Web Security

The University of Melbourne: *Bachelor of Commerce*

Jan 2021 – Dec 2023

- WAM: 81.7%; Double Majored in Economics and Finance

Technical Skills

Programming Languages: Java, JavaScript, TypeScript, Python, SQL, C#, CSS, PHP, Swift, Bash

Frameworks & Tools: Git, Docker, Excel, React, React Native, MySQL, PostgreSQL, AWS, Flask, Spring Boot, Apache, Agile, ELK Stack, WordPress, Figma, Linux, Claude, ChatGPT

Certifications: CompTIA A+ (Expected 6/26), Google Cybersecurity

Experience

Braver Ventures: *Full Stack Developer Intern*

Jul 2025 – Nov 2025

- Designed and deployed a full-stack website using React, Spring Boot, and AWS to serve as a mental health tool for clinicians to assign personalized exercises and clients to complete and journal reflections.
- Led development as Tech Lead in a team of 5 on a project basis, responsible for resolving merge conflicts, troubleshooting technical issues, and presenting live product demonstration to the client.

Amplifon: *Consultant Intern*

Mar 2025 – Jun 2025

- Collaborated in a team of 4 to present a strategic plan of 6 strategic recommendations to Amplifon, focusing on industry trends, competitor positioning, and future growth opportunities.
- Used Excel to integrate and manipulate datasets and web scraping tools in Python to identify 3 new digital outreach channels and a roadmap for reaching 1.4 million eligible clients in the Australian audiology market.

Projects

Mini-SIEM | Elastic Stack (Logstash, Elasticsearch, Kibana), Bash, Docker

Jan 2026 – Apr 2026

- Deployed a self-hosted ELK stack in Docker, collecting and parsing logs from various log sources to display relevant security metrics on a professional security dashboard in Kibana.
- Parsed different log formats by adding grok patterns and conditional logic in Logstash.

Vulnerability Reproduction - WordPress | Docker, PHP, Apache

Oct 2025

- Identified the root cause in a WordPress plugin's unescaped user input handling, exploited the vulnerability via a crafted shortcode payload, and implemented a fix by sanitizing all attributes in the shortcode entry point.

Fuzzing SQLite | Python, C, SQLite, Docker, Linux Shell Scripting

Aug 2024 – Sep 2024

- Fuzz-tested an old version of SQLite on a virtual Docker container to discover vulnerabilities by running automated fuzzing tools such as mutation-based and grammar-based fuzzing.

Leadership

Malaysians of Melbourne University: *Assistant Sponsorship Director*

Sep 2022 – Sep 2023

- Led and coordinated a team of 10 officers, fostering collaboration, effectively delegating tasks, and ensuring smooth project execution across multiple sponsorship initiatives.
- Secured and maintained partnerships with 70+ FnB sponsors and 11 corporate sponsors (such as Creador and OSK Property), resulting in monetary contributions over \$5000 and exposure to 1000+ members.

Malaysian Students' Council of Australia Victoria: *Vice-Treasurer*

Jun 2022 – Dec 2022

- Served as treasurer for Colours of Malaysia, MASCA Vic's flagship cultural event; created comprehensive budgets across all departments and managed expenses to ensure profitability.
